| Schools | Ineligible Commercial |
| Parks/CKC | Ineligible Industrial |
| 1000-Foot Separation | Ineligible office |

0 1,000 2,000 4,000 Feet

NOTES:

This map shows commercial zones where retail sales are allowed under the Kirkland Zoning ordinance and industrial zones where production and processing are allowed. Also shown are areas within 1000' of known parks, schools, day care facilities and transit facilities in which marijuana sales, processing and production are not allowed under state law. The areas shown in bright red and orange are the portions of commercial zones unaffected by the 1000' prohibition where marijuana sales could occur. The areas shown in bright light blue are the portions of light industrial zones unaffected by the 1000' prohibition where marijuana processing and/or production could occur.

The map is based on the current known location of parks, schools, day care facilities and transit centers. It is subject to change should the location of these facilities change.

All marijuana sales, processing and production businesses must be licensed by the State Liquor Control Board (LCB) and would be subject to detailed regulations issued by the LCB. Marijuana businesses would also be subject to all applicable zoning regulations.
